### About Us

Neotech Group promoted by technocrats having extensive experience in Agro-based Engineering and Chemical & Petro Chemical industries. Our mission has been to develop new technologies & manufacture indigenously unique products based on agricultural by-products such as Corn Cobs to suit varied industrial applications. Neotech have developed unique technology for processing of agricultural wastes & by-products such as Corn Cobs into valued added products for use as -

1. Abrasive & Absorbent Media in surface finishing of Metal/Plastic components & parts
2. Animal Feed Nutrients/Supplements , Additives in the Poultry Industry
3. Biodegradable Absorbent/Carrier in diverse industries.

### Our Products

#### Abrasive & Absorbent Media

**NeoGrit** - It is an excellent Abrasive & Absorbent Media suitable for use in polishing, drying, soft de-burring of engineering, metal & plastic components in a Vibratory finishing M/Cs, Tumbling Barrels, Centrifugal M/Cs.

**NeoGloss - Coated NeoGrit** for imparting superior surface finish/polish, Gloss to Engineering components. In addition it is also suitable for de-scaling, de-rusting and de-burring of metal & plastic components.

Above products come in several mesh sizes (4 to 200 mesh) to suit individual requirements of the customers

#### Animal Feed Nutrients/Supplements (Poultry)

**NeoSil** - A specially processed Hydrated Sodium Calcium AluminoSilicate (HSCAS) for selective Binding of Aflatoxins in Animal Feeds.

**NeoChol** - 60% Dry Choline Chloride on Cereal/Vegetable Carrier

**NeoPhyl** - A Structurally Modified Phyllosilicate binding of Mycotoxins in Animal Feeds.

**NeoMax** - A Probiotic, Acidifier, Bio-Regulator & Production Promoter

**NeoGro** - Growth Promoter & Feed Flavouring Agent

**Biodegradable Absorbent/Carrier - NeoSorb**

**NeoSorb** is natural farm by-product made from Corn cobs and suitable for use in disposal of Liquid/Solid wastes, waste fluid spills such as oil, chemicals, etc. It can also be used as an effective Poultry Litter conditioner in the Breeding & commercial animal farms.

It is an excellent absorbent/adsorbent medium suitable for use either as a diluent/carrier or filler media in Animal Health products such as Vitamin Premixes, Vet. formulatins, Nutrients, Minerals, Ayurvedic / Herbal formulations. Further, It could also be used as an inert filler in plastic moulding powders such as Bakelite.

**Neosorb** is available in several Grades/Mesh sizes to suit diverse applications.
